Additional Business: ID cards for students, employees, etc.

Some information about the assignments we undertake :

High End Solution :

We are working for a good cause i.e. to try and eliminate the age fraud problem which is persisting. In this regard we have , under the guidance of eminent Sports Authority personnel and the guidelines of the GR, developed an ID card for the sport persons with an inherent data storage facility and salient features like tamperproof data storage, MIS report generation, computer generated payment receipt and record etc. These features will help our nation to host fair and clean events .We are currently in discussion with the various sports federation for it's implementation.

These smart cards and the associated software can be customized for other similar applications

Low end Solution :

In addition to the smart cards we also can provide the conventional laminated ID cards for all applications viz. schools, colleges and other educational institutions, employees, hospitals, security personnel etc.

For a per card budget ranging from ` 35 to ` 500 we, at A2S Solutions have a solution for your card needs!
